GLOBAL ECONOMIC OUTLOOK: SEEKING SUSTAINABLE GROWTH

While global economic indicators continue to rise, and growth surpasses estimates in advanced, emerging and developing economies, market volatility, looming trade wars and heightened international security continue to test the world’s economic and political stability. What are the major risks currently affecting the global economy and where are the new opportunities for growth? What measures should be implemented to boost potential output and consolidate the economic recovery? How can persistent problems such as low productivity and high income inequality be confronted and overcome? What new multilateral efforts are needed to tackle common challenges in an integrated global economy?

GLOBAL REAL ESTATE: RESPONDING TO CLIMATE CHANGE
In collaboration with JPMorgan Chase & Co.

With buildings accounting for over 40% of energy consumption and 30% of global carbon emissions, sustainability in the real estate sector is a prominent issue as the industry has both a significant impact on the environment and the efforts to curtail global warming. What strategies are real estate leaders implementing to decarbonize their portfolios? How can environmental impacts be lowered and social and economic value maximized over a building's life-cycle? How are technology and advanced materials impacting construction and building operations in the quest to respond to environmental considerations? How can the public and private sector work together to ensure the sector supports global climate change mitigation goals?

MODERATOR
Jonathan Laski, Director, Global Projects and Partnerships, World Green Building Council (WorldGBC)
